Experience

UX/UI Designer at Ericsson

Sep 2019–Apr 2024

Ericsson Private 5G Project

- Designed a role-based platform for installing, configuring, and managing private 5G networks.
- Structured a highly complex and dependency-driven configuration process into a clear step-by-step flow, enabling correct system setup.
- Translated technical constraints and system dependencies into usable design solutions through close collaboration with engineers and stakeholders
- Improved clarity and usability of complex configuration tasks by breaking them into manageable steps aligned with system logic.
- Collaborated closely with cross-functional teams in an Agile environment to deliver implementable design solutions.

UX/UI Designer at Ericsson

May 2017–Sep 2019

Connected Urban Transport Project

- Designed interfaces for an Advanced Traffic Management platform used by the City of Dallas, USA.
- Designed map-based interfaces to monitor and manage traffic systems and real-time data, improving visibility of system status.
- Designed draggable panels, allowing users to organize their workspace and monitor traffic systems and network traffic more efficiently.
- Contributed to UI patterns while the design system was still evolving, supporting consistency across the product.
- Collaborated closely with developers and cross-functional teams in an agile environment to align design decisions with technical constraints and implementation needs.

Education

(2015–2017) MSc in Interaction Design and Technologies

Chalmers University of Technology, Sweden

(2009–2012) BA in Literature, Culture & Digital Media (LCDM)

Blekinge Institute of Technology (BTH), Sweden

(2006–2007) Interior Design Program

Campus of Fine Arts, University of Tehran, Iran

(2005–2009) BSc in Software Engineering

Shahryar Azad University, Iran
